# Acknowledgements

This document was developed by *Live Healthy Lane*, which is comprised of Lane County, PeaceHealth Oregon Network, Trillium Community Health Plan, United Way of Lane County, and other organizations invested in the Lane County's 2018 Community Health Needs Assessment. Karen Gaffney, the Director of Lane County Health and Human Services, facilitated the event. Committees working to advance the health of Lane County were pivotal in completing this assessment and include:

100% Health Executive Team  
Live Healthy Lane Core Team

The participants who engaged in this assessment include:

Liz Bainter, PacificSource Health Plans  
Gustavo Balderas, Eugene School District 4J  
Susan Ban, ShelterCare  
Susan Blane, PeaceHealth Oregon Network  
Cheryl Boyum, Cascade Health  
Jay Bosievich, Lane County Board of Commissioners  
Michelle Cady, Cornerstone Community Housing  
Tara DaVee, Trillium Community Advisory Council  
Bess Day, United Way of Lane County, Early Learning Alliance  
Noreen Dunnells, United Way of Lane County  
Tom Ewing, Planned Parenthood of Southwestern Oregon  
Pat Farr, Lane County Board of Commissioners  
Mark Florian, PacificSource Health Plans  
Brian Johnson, Lane County Public Health  
Robert Killen, Springfield Area Chamber of Commerce  
Richard Kincade, Community Health Centers of Lane County  
Ela Kubok, Homes For Good

# INTRODUCTION

## Live Healthy Lane

Creating a healthy community is a shared responsibility. By working together, we have the potential to create a caring community where all people can live a healthier life. *Live Healthy Lane* brings together Lane County, PeaceHealth Oregon Network, Trillium Community Health Plan, United Way of Lane County, local organizations, and community members to contribute to improving the lives of everyone in Lane County.

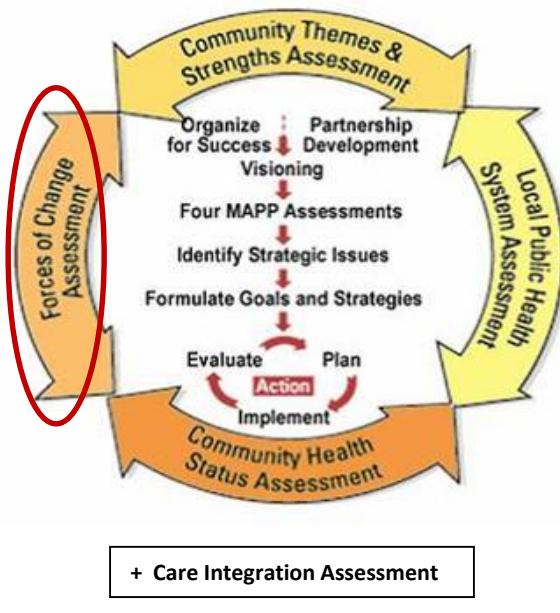

*Live Healthy Lane* uses the Mobilizing for Action through Planning and Partnerships (MAPP; NACCHO, 2018) model (see Figure 1) for collecting data that inform how we as a community can improve our health. Specifically, Lane County's Community Health Improvement Plan (CHIP) is shaped by data collected by the Community Health Needs Assessment (CHNA), which uses MAPP as its strategic planning process.

In 2015-2016, LHL conducted an in-depth MAPP assessment (see Appendix B). Although the current assessment uses MAPP principles, it is meant to "refresh," or update, 2015-2016 data, and thus should be considered in conjunction with the prior full assessment when planning the 2020-2023 CHIP.

## Forces of Change Assessment

A standard part of MAPP, the Forces of Change Assessment (FOCA) explores positive and negative forces predicted to influence health and health systems in the next five years (e.g., 2018-2023). Forces take into account, for example, those that are social, economic, political, geographic, environmental, technological, legal, ethical, and/or demographic in nature. These forces can be trends, factors, and events. *Trends* are patterns over time (e.g., increasing shortage of housing); *factors* capture a community's unique characteristics (e.g., Lane County's diverse geographical landscape); *events*

Figure 1

include one-time incidents (e.g., county-wide tobacco legislation). The FOCA also uncovers the opportunities and threats that predicted forces may bring to Lane County (e.g., equity considerations as they impact immigration policy). In sum, the purpose of the FOCA is to *identify trends, factors, and events that are expected to influence health and health systems in Lane County, Oregon*.

This report that summarizes the FOCA is intended to assist the *Live Healthy Lane* planning teams (i.e., Core Team, 100% Health Executive Team) in shaping the 2020-2023 CHIP strategy. The report includes the FOCA's:

- 1) methods,
- 2) key findings,
- 3) strengths and limitations, and
- 4) an appendix with detailed data.

## METHODS

On June 13, 2018, Lane County held its second Forces of Change Assessment (FOCA) at the Willamalane Bob Keefer Center in Springfield, Oregon. (Lane County's first FOCA was held in May 2015). To best consider the foreseeable forces, participants included a broad range of community members who understand and influence policy development, and thus are systems-level thinkers (e.g., government officials, non-profit directors, medical directors, hospital administrators). Such individuals are positioned to best predict upcoming trends, factors, and events, and in turn consider related threats and opportunities. Specifically, participants included 35 individuals representing sectors in Lane County directly related to public health, medicine, government, social & human services, services, non-profit, education, law, environment, and technology.

Karen Gaffney, the Director of Lane County Health and Human Services, facilitated the assessment. First, Karen reviewed for participants the process and goal for the assessment. Next, participants engaged in a brainstorming session aimed at identifying forces. Specifically, they were asked to write down perceived forces of change (see Appendix B. Forces of Change Brainstorming Worksheet). Third, using the snow card technique (Bryson, 2004), which is a straightforward and effective approach for generating a list of information from a group of people, participants were asked to consider the five forces from their larger list of which they considered most prominent. Fourth, as a large group, the facilitator gathered primary forces (1-8, in order of prominence) from each participant and posted these forces to the front of the room. Next, the large group categorized the forces (e.g., housing, technology, etc.) and titled them as, "primary forces" under which myriad "sub-forces" were listed. Finally, the primary forces were noted on large sticky notes and, in small groups, participants discussed and then wrote on the sticky notes specific potential threats or opportunities generated by the primary forces. Finally, Karen summarized the key forces and shared next steps for the assessment process.

## KEY FINDINGS

### Primary Forces

The following five categories emerged as primary forces. The categories are listed in order of how many times they were noted by participants, with the number of times they were noted in parenthesis:

- |                                  |                         |
|----------------------------------|-------------------------|
| 1. Housing (20)                  | 4. Technology (9)       |
| 2. Federal & State Politics (14) | 5. Public Discourse (9) |
| 3. Immigration (12)              |                         |

Furthermore, three other categories of forces, Access, Behavioral Health, and the Aging Population, emerged. Data from these additional forces, including related threats posed and opportunities created, are included in Appendix A.

Of note are that two primary force categories, Federal & State Politics and Public Discourse, did not emerge as themes in Lane County's 2015 Forces of Change Assessment. All other forces emerged in the prior assessment, although not necessarily in precisely the same way (e.g., "Technology" in 2019 and "Technology in Healthcare" in 2015). Highlights from the 2015 assessment are included in Appendix C.

## Forces, Threats, and Opportunities

To follow, a brief narrative highlighting each primary force and how it influences health and health systems is provided, along with a table including related sub-forces, threats posed, and opportunities created. (Appendix A provides data from which these summary tables emerged.)

Of note is the interrelated nature of the five primary forces. For instance, housing is influenced by federal and state politics and public discourse, while politics and public discourse influence housing and immigration. Because of the interconnected nature of the forces, threats and opportunities are also naturally interconnected. For instance, fear is a threat to housing, immigration, and public discourse; and, equity, in some form, is an opportunity created for all five forces. Given the overlapping nature of forces, threats, and opportunities, information in all the tables should be considered together.

The social ecological model (SEM; CDC, 2018) is used to organize the threats and opportunities in each table, because this perspective demonstrates the interrelated nature between the factors listed. The SEM emphasizes people's interactions with their physical and sociocultural environments, and in turn, the multifaceted nature of those factors and how they influence health (NIH, 2005). Specifically, the model puts forward five factors of influence (McLeroy, et al., 1988) on health including *public policy factors* (e.g., educational systems, sanctioned prevention), *community factors* (e.g., neighborhood structure and economy), *institutional factors* (e.g., city-wide health services availability), *interpersonal factors* (e.g., cultural beliefs, attitudes, and behaviors), and *intrapersonal factors* (e.g., personal beliefs, attitudes, and behaviors).

## 2018 Forces of Change Assessment

Lane County, Oregon

**Housing.** A 2018 Point-In-Time count identified 1,641 unsheltered individuals living in Lane County, with over 80% being single adults. Moreover, approximately 138 individuals become homeless each month in Lane County (Technical Assistance Foundation, 2018). Individuals and families are homeless for myriad reasons including, but not limited to, housing and rent costs that rise faster than wages, the burden of childcare costs, increasing competition for a limited supply of affordable housing, behavioral health services that do not adequately support needs, domestic violence, and/or circumstance of abuse, personal trauma, and hardship (City of Eugene, 2018). There is widespread understanding that housing *is* healthcare (National Healthcare for the Homeless Council, 2011), and thus housing influences health and is a public health responsibility.

**Table 1. Housing**

Sub-Forces	Threats Posed	Opportunities Created
<ul style="list-style-type: none"> <li>➤ Housing Insecurity</li> <li>➤ Homelessness</li> </ul>	<ul style="list-style-type: none"> <li>➤ Public Policy <ul style="list-style-type: none"> <li>▪ Zoning and codes</li> <li>▪ HUD funding</li> <li>▪ Housing crisis</li> </ul> </li> <li>➤ Community/Institution <ul style="list-style-type: none"> <li>▪ Wage stagnation</li> <li>▪ Low/no housing = barrier to recruiting healthcare providers</li> <li>▪ Inward migration</li> <li>▪ Lack of documentation = barrier to secure housing</li> <li>▪ Increasing crime rates</li> <li>▪ Poverty</li> </ul> </li> <li>➤ Intrapersonal/Interpersonal <ul style="list-style-type: none"> <li>▪ Housing instability</li> <li>▪ Evictions</li> <li>▪ Fear (e.g., Not In My Back Yard/Not In My Front Yard Either)</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>➤ Public Policy <ul style="list-style-type: none"> <li>▪ Zoning and codes</li> <li>▪ Economic support</li> <li>▪ Alternative housing support</li> <li>▪ Equity regulations</li> </ul> </li> <li>➤ Community/Institution <ul style="list-style-type: none"> <li>▪ Housing first efforts</li> <li>▪ Accessible housing for seniors</li> <li>▪ Support for aging in place</li> <li>▪ Education</li> <li>▪ Community mobilizing and collaboration</li> </ul> </li> <li>➤ Intrapersonal/Interpersonal <ul style="list-style-type: none"> <li>▪ Widespread knowledge of housing crisis</li> <li>▪ Widespread knowledge that housing is healthcare</li> <li>▪ Support (e.g., Yes In My Back Yard)</li> </ul> </li> </ul>

**Federal and State Politics.** The current state of politics, both locally and nationally, is divided. Voters, including politicians, are driven by their “political tribe” rather than principles or ideology. Instead of beliefs determining political identity, political identity often determines beliefs (Liasson, 2018). At a state level, there is an urban-rural divide where urban communities are predominantly democratic and rural communities are predominantly republican. Given that the majority of Oregon’s population is urban, the state remains predominantly democratic. In turn, democratic politics inform rural areas of the state despite the voters in those regions being primarily republican (Denning, 2019). Federal and state politics inherently influence policies that directly and indirectly influence health and health systems (e.g., Affordable Care Act, tax reform).

**Table 2. Federal & State Politics**

Sub-Forces	Threats Posed	Opportunities Created
<ul style="list-style-type: none"> <li>➤ Change in the use of executive power</li> <li>➤ Policy and budget changes</li> <li>➤ U.S. Congress</li> <li>➤ Elected officials</li> <li>➤ Public Discourse</li> <li>➤ Budget changes</li> </ul>	<ul style="list-style-type: none"> <li>➤ <b>Public Policy</b> <ul style="list-style-type: none"> <li>▪ ACA repeal/reform</li> <li>▪ Medicare changes</li> <li>▪ Increasing mergers and acquisitions</li> <li>▪ 340B Drug Discount Program</li> <li>▪ Budget deficit</li> <li>▪ Tax reform</li> <li>▪ Social security cuts</li> <li>▪ Hyperinflation = market crash</li> <li>▪ EPA reform</li> <li>▪ Trade policy changes</li> <li>▪ Defense industry prioritization</li> </ul> </li> <li>➤ <b>Community/Institution</b> <ul style="list-style-type: none"> <li>▪ Rural communities not supported</li> <li>▪ Safety Net erosion</li> <li>▪ Decrease in women’s health services/support</li> <li>▪ Racism</li> <li>▪ Nationalism</li> <li>▪ Cultural and geographical divide</li> <li>▪ Inequitable distribution of available funds</li> <li>▪ Disengagement</li> <li>▪ Opposition</li> </ul> </li> <li>➤ <b>Intrapersonal/Interpersonal</b> <ul style="list-style-type: none"> <li>▪ Lack of knowledge about and distrust in science</li> <li>▪ Government distrust</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>➤ <b>Public Policy</b> <ul style="list-style-type: none"> <li>▪ Political term limits</li> <li>▪ Local investments and control</li> <li>▪ ACA improvements</li> <li>▪ Opioid prevention funding</li> </ul> </li> <li>➤ <b>Community/Institution</b> <ul style="list-style-type: none"> <li>▪ Creative budgets</li> <li>▪ Media accountability</li> <li>▪ Collaborative local funding</li> <li>▪ Lack of funds = innovation</li> <li>▪ Increased youth engagement</li> <li>▪ Dysfunctional federal and state government = collaboration</li> <li>▪ Equity efforts/training</li> </ul> </li> <li>➤ <b>Intrapersonal/Interpersonal</b> <ul style="list-style-type: none"> <li>▪ Critical thinking</li> <li>▪ Public official outreach</li> <li>▪ Voting</li> </ul> </li> </ul>

**Immigration.** Throughout America’s history, immigrants have been confronted with discrimination, being denied basic human needs such as healthcare, employment, housing, and social services (Alameda County Public Health Department, 2017) – services that directly influence health. National politics have recently taken a hyper-focus on immigration despite the number of undocumented immigrants in the United States decreasing over the past

## 2018 Forces of Change Assessment

Lane County, Oregon

several decades (Manuel Krogstad, Passel, & Cohn, 2018). And, the current national executive branch has focused on immigration as a threat. Contradictory to national politics, Lane County follows ORS 181A.820, which “prevents state and local law enforcement agencies from targeting people based on their race or ethnic origin when those individuals are not suspected of criminal activity” (Lane County, 2018). In sum, the aim of the ordinance is to protect personal information of citizens and undocumented immigrants. Immigration is a public health issue, and thus influences community health and health systems.

**Table 3. Immigration**

Sub-Forces	Threats Posed	Opportunities Created
<ul style="list-style-type: none"> <li>➤ Policy changes</li> <li>➤ Fear</li> </ul>	<ul style="list-style-type: none"> <li>➤ Public Policy <ul style="list-style-type: none"> <li>▪ Immigration reform</li> <li>▪ No funds for sanctuary cities</li> <li>▪ Change to Oregon driver's licenses</li> <li>▪ Detention = interrupted education</li> </ul> </li> <li>➤ Community/Institution <ul style="list-style-type: none"> <li>▪ Increased health disparities</li> <li>▪ Decrease in workforce</li> <li>▪ Lack of public safety</li> <li>▪ Separation of families</li> <li>▪ New diseases</li> <li>▪ No cultural support</li> </ul> </li> <li>➤ Intrapersonal/Interpersonal <ul style="list-style-type: none"> <li>▪ Hate speech and crimes</li> <li>▪ Trauma = fewer people accessing care, need for more specialized care</li> <li>▪ Isolation</li> <li>▪ Biased treatment</li> <li>▪ Racism</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>➤ Public Policy <ul style="list-style-type: none"> <li>▪ Improved advocacy and policies</li> <li>▪ Sanctuary cities</li> </ul> </li> <li>➤ Community/Institution <ul style="list-style-type: none"> <li>▪ Safe spaces</li> <li>▪ Better communication of policies</li> <li>▪ Workforce development</li> <li>▪ Equity efforts/training</li> <li>▪ Accurate demographic reporting</li> <li>▪ Service integration</li> <li>▪ Media accountability</li> <li>▪ Equity efforts/trainings</li> </ul> </li> <li>➤ Intrapersonal/Interpersonal <ul style="list-style-type: none"> <li>▪ Critical thinking</li> <li>▪ Public official outreach</li> <li>▪ Voting</li> </ul> </li> </ul>

**Technology.** Over the past several decades, technological advancements including, for example, Electronic Health Records (EHR), data systems, and telemedicine, have significantly impacted health and health systems. EHR have, for the most part, replaced paper records and impacted medical billing, scheduling, ease of patients' access to information, and improved epidemiological reporting (Banova, 2018). In addition, systems are in place that better facilitate data holding, analyzing, and sharing, which can subsequently result in reduced healthcare costs, better predicting of epidemics, preventing deaths, improving quality of life, reducing healthcare waste, improving efficiency and quality of care, and informing new drug development (Banova, 2018). Furthermore, telemedicine can support individuals who are too sick to leave their home or who live in remote areas. Although there are multiple benefits to technological advancements, there are also disadvantages including, for instance, challenges with patient privacy (i.e., how to store safely patient data), and access issues (e.g., telemedicine is not universal nor do all people have access to the Internet; Banova, 2018).

**Table 4. Technology**

Sub-Forces	Threats Posed	Opportunities Created
<ul style="list-style-type: none"> <li>➤ Smartphones</li> <li>➤ Drones</li> <li>➤ Healthcare technology</li> <li>➤ Artificial intelligence</li> <li>➤ Nano-technology</li> <li>➤ Other advancements</li> </ul>	<ul style="list-style-type: none"> <li>➤ <b>Public Policy</b> <ul style="list-style-type: none"> <li>▪ Data privacy laws</li> </ul> </li> <li>➤ <b>Community/Institution</b> <ul style="list-style-type: none"> <li>▪ Lack of integration of healthcare</li> <li>▪ Disconnected Electronic Medical Records</li> <li>▪ Access inhibited by Socioeconomic Status</li> <li>▪ Increased cost</li> <li>▪ Low-skilled workers pushed out</li> </ul> </li> <li>➤ <b>Intrapersonal/Interpersonal</b> <ul style="list-style-type: none"> <li>▪ Advancements outpace knowledge</li> <li>▪ Social isolation</li> <li>▪ Psychological distress</li> <li>▪ Dependence on smartphones</li> <li>▪ Lack of data sharing</li> <li>▪ Knowledge gaps</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>➤ <b>Public Policy</b> <ul style="list-style-type: none"> <li>▪ Improved advocacy and policies</li> <li>▪ Internet as a public utility</li> </ul> </li> <li>➤ <b>Community/Institution</b> <ul style="list-style-type: none"> <li>▪ Integrated data collection and sharing</li> <li>▪ Workplace, etc. efficiencies</li> <li>▪ Labor scarcity solutions</li> <li>▪ Connectedness</li> <li>▪ Equity outcomes</li> <li>▪ Drones as first responders</li> <li>▪ Automated transportation</li> <li>▪ Telemedicine</li> </ul> </li> <li>➤ <b>Intrapersonal/Interpersonal</b> <ul style="list-style-type: none"> <li>▪ Dependence on smartphones</li> <li>▪ Knowledge/trainings accessible</li> </ul> </li> </ul>

**Public Discourse.** Health and health systems are shaped by moral and political beliefs and public communication about these beliefs. Political divide at the national and state levels (Denning, 2019), as well as a misinformation stream at the national level (Kessler, Kelly, Rizzo, & Hee Lee, 2018), have led to public mistrust and fear (Montanaro, 2018), which in turn heighten oppositional conversations about moral and political beliefs (i.e., public discourse). Public discourse influences voter turnout. For instance, in the 2016 national election, only about 58% of eligible voters (138 million Americans) participated. In the 2018 midterm election, however, with public discourse heightened, an unprecedented number of people cast their ballot (47% compared to 37% in 2014; Domonock, 2018). Public discourse, as well as voter turnout, influence health and health systems. For example, public discourse about immigration can influence people to vote for politicians who align with their own related beliefs, and subsequently, elected officials inform related policy development that inherently impacts the health of immigrants and the health systems that support immigrants.

**Table 5. Public Discourse**

Sub-Forces	Threats Posed	Opportunities Created

## STRENGTHS AND LIMITATIONS

The qualitative nature of this assessment provides opportunity for exploration and discovery of forces expected to influence health and health systems in Lane County, Oregon over the next five years. Respondents were recruited from myriad different healthcare sectors in Lane County, and as a whole provided substantial contributions to assessing forces that may influence health over the next five years in Lane County (Polkinghorne, 2005). This report provides a snapshot of potential forces in the county. Nevertheless, the assessment results are based only on respondents' point-in-time perceptions, experience, and knowledge. Subsequently, although the methods for this assessment were the same as those used in 2015-2016, the results may be different due to different participants and different point-in-time responses. The current results, in turn, are meant to inform the 2020-2023 Community Health Improvement Plan, and should be considered in conjunction with the 2015-2016 FOCA results and other data collected during Lane County's 2018-2019 needs assessment MAPP process. Further, future assessments should replicate and extend this assessment to uncover details and nuances related to those factors that influence health and health systems in Lane County, Oregon.

Forces	Threats Posed	Opportunities Created
<ul style="list-style-type: none"> <li>• Increase in-patient mental health services for youth</li> <li>• Growing need for increased mental health support</li> <li>• Behavioral health (mental health, addiction, access to care) (n = 2)</li> <li>• Increasing need for mental health services (suicide, social media, isolation) (n = 2)</li> <li>• Insufficient youth mental health resources</li> <li>• Opioids</li> <li>• Opioid epidemic continues to be misunderstood</li> <li>• Continued high drug use and addiction</li> </ul>	<ul style="list-style-type: none"> <li>• Suicide rate</li> <li>• Limited access, especially rural</li> <li>• Substance abuse</li> <li>• Schools overwhelmed</li> <li>• Financial decrease</li> <li>• Uncoordinated care</li> <li>• Availability and variety of service providers</li> <li>• Increased crime rate</li> <li>• Vicarious trauma of staff and families</li> <li>• Social isolation of youth and seniors</li> <li>• Underemployment/unemployment</li> <li>• Increased number of people experiencing behavioral health challenges</li> <li>• Inappropriate over-prescription of psychoactive drugs</li> <li>• Rx interactions</li> <li>• Lack of knowledge and training within senior services to address co-occurring physical and behavioral health</li> <li>• Pop “Science”</li> <li>• Social media (isolation, cyber bullying, “mean”)</li> <li>• Kids suffer from parents’ challenges</li> <li>• Stigma</li> <li>• Misdiagnosis</li> <li>• Billing and costs</li> <li>• Lack of prescribers</li> <li>• Overdose</li> <li>• Extended families taking on care of children</li> </ul>	<ul style="list-style-type: none"> <li>• Trauma-informed Care</li> <li>• Integration of all systems with physical health</li> <li>• Shared services and resources</li> <li>• Supported housing</li> <li>• Coordination of services between providers</li> <li>• Mobile crisis response in rural areas</li> <li>• Integration of public safety and behavioral health services</li> <li>• Youth prevention</li> <li>• Support in K-12 education</li> <li>• Housing and neighborhoods designed to promote socialization</li> <li>• Harm reduction versus abstinence (how to best treat individual addiction and awareness)</li> <li>• Early childhood/parenting interventions</li> <li>• Peer Support Specialists</li> <li>• Depression awareness for Seniors</li> <li>• Shared data across all health indicators</li> <li>• Study results incorporated into local public health education</li> <li>• Impact of activity on mental health</li> <li>• Supported employment</li> <li>• “In shape” exercise and nutrition</li> <li>• Mentoring peers</li> <li>• Person-centered care</li> <li>• Harm reduction</li> <li>• Focus on pain management</li> <li>• Provide services for youth (and others) in acute crises</li> </ul>

## 8. Aging Population

Forces	Threats Posed	Opportunities Created
<ul style="list-style-type: none"> <li>• Boomers</li> <li>• Diversifying, aging growing population</li> <li>• Increasing aging patient population</li> <li>• Increasing population of seniors without adequate retirement savings</li> <li>• Growing vulnerable elderly population</li> <li>• Exponential growth in seniors/older adults, (28% by 2020 of Lane County population; 30% by 2025)</li> </ul>	<ul style="list-style-type: none"> <li>• Isolation</li> <li>• High maintenance expected</li> <li>• Economic disparity 20 to 08 recession and decreased retirement plans</li> <li>• Higher incidence of chronic disease</li> <li>• Epidemic vulnerability</li> <li>• Bed availability</li> <li>• Lack of internal med and/or geriatric providers of all types</li> <li>• Increased number of elderly in the population</li> <li>• Burden on existing programs</li> <li>• Burden on younger, smaller generations</li> <li>• Increased suicide rates</li> <li>• Insufficient patient assistance programs</li> <li>• Increased institutional living that is unregulated</li> <li>• Lack of support for family/unpaid caregivers</li> <li>• Homelessness</li> <li>• Lack of retirement/savings/social security</li> <li>• Funding changes</li> <li>• Lack of variety of housing and service options</li> <li>• Changes to medicine programs</li> <li>• Rural access</li> <li>• Demand bubble (in 20 years, needs change)</li> <li>• Caring for elderly parents</li> <li>• Cultural differences between Boomers and other elderly</li> <li>• Services – in-home care</li> <li>• Increased cost of pharmaceuticals/biological agents (high impact to the community)</li> <li>• Caregiver depression, anxiety, and lack of support</li> <li>• Increased chronic conditions</li> <li>• Mobility and transportation</li> </ul>	<ul style="list-style-type: none"> <li>• Volunteerism</li> <li>• Telemedicine</li> <li>• Skills-based volunteerism</li> <li>• Health promotional, community-based programs – YMCA, Willamalane, Community Centers, Silver Sneakers, etc.</li> <li>• Immunization – flu, pertussis, (phell?), zoster</li> <li>• Mentorship</li> <li>• Exploit their advocacy</li> <li>• Generation – “focused” programs for Boomers versus GenX, etc.</li> <li>• Education/acceptance of palliative, terminal care options</li> <li>• Intergenerational connections</li> <li>• Foster Grandparents (seniors volunteer in schools)</li> <li>• Educational training opportunities</li> <li>• Volunteer/mentorship</li> <li>• Social interaction</li> <li>• Age-specific community building</li> <li>• Paid family leave</li> <li>• Smaller homes</li> </ul>

**APPENDIX B.**  
**Forces of Change Brainstorming Worksheet**

## **Forces of Change Brainstorming Worksheet**

This two-page worksheet is designed to use in preparing for the Forces of Change Assessment.

### **What are Forces of Change?**

**Forces are a broad all-encompassing category** that includes trends, events, and factors.

- **Trends are patterns over time**, such as migration in and out of a community or a growing disillusionment with government.
- **Factors are discrete elements**, such as a community's large ethnic population, an urban setting, or a jurisdiction's proximity to a major waterway.
- **Events are one-time occurrences**, such as a hospital closure, a natural disaster, or the passage of new legislation.

### **What Kind of Areas or Categories Are Included?**

Be sure to consider any and all types of forces, including:

- social
- economic
- political
- technological
- environmental
- scientific
- legal
- ethical

### **How To Identify Forces of Change**

Think about forces of change — outside of your control — that affect the local public health system or community.

1. What has occurred recently that may affect our local public health system or community?
2. What may occur in the future?
3. Are there any trends occurring that will have an impact? Describe the trends.
4. What forces are occurring locally? Regionally? Nationally? Globally?
5. What characteristics of our jurisdiction or state may pose an opportunity or threat?
6. What may occur or has occurred that may pose a barrier to achieving the shared vision?

## **Forces of Change Brainstorming Worksheet**

**(Page 2)**

2018 Forces of Change Assessment  
Lane County, Oregon

Using the information from the previous page, list all brainstormed forces, including factors, events, and trends. Continue onto another page if needed. Bring the completed worksheet to the brainstorming session

**APPENDIX C.**  
**Forces of Change Assessment – 2015 Highlights**

The following forces were identified as influencing community health and/or impacting the work of the local public health system:

- Collaboration
- Access to primary care
- Funding for healthcare
- Affordable Care Act
- Care delivery system
- Technology in healthcare
- Dental
- Public Health workforce
- Political and leadership changes
- Economy
- Education funding
- Healthy schools
- Environment
- Community infrastructure
- Affordable housing
- Poverty
- Rural
- Changing demographics
- Behavioral/mental health
- Health behaviors
- Communicable disease

Common reoccurring threats emerged as:

- The impact of poverty and economic shifts overwhelming the systems of:
  - Education
  - Employment
  - Affordable housing
- Shortages of resources and funding shifts
- Increased costs
- New legislation

Common reoccurring opportunities emerged as:

- Access to healthcare
- Collaboration and innovation
- Emerging technology
- Focus on prevention
